Smile with ease

Love the experience™

The new Smile platform from Unitron helps you bring your clients clever solutions that enhance their hearing journey, allowing them to delight in what life has to offer – while giving you the tools and confidence to deliver exceptional care at every step.

Easy to hear

Give your clients a hearing experience that transforms not just how they hear, but how they live. With the new ERA™ chip, our best-ever sound performance and industry-leading universal connectivity come together for an uplifting experience.

Brilliant sound performance

Smile is the platform designed to help clients feel it all, from ear to ear.

Powered by the new ERA chip, our AI-trained Integra OS classifi es and blends from 8 different listening environments, seamlessly adjusting sound to enhance life's moments. From calm and quiet to noisy and boisterous, Integra OS automatically optimises performance.

Improved HyperFocus, now with Dynamic Noise Reduction, zeroes in on conversations so clients can engage, even in loud noise environments.

Speech Enhancement with Soft Speech delivers better understanding in quiet conversations, reducing listening effort in the moment and fatigue at the end of the day.*

Whether they're navigating the hustle and bustle of a busy café or soaking up the quiet at home, your clients can feel the joy in every chat, laugh and story.

Universal connectivity

Connectivity gets an exciting advancement, too. Smile delivers universal connectivity thanks to the ERA chip. It's equipped with updated Bluetooth,® making it easier than ever for clients to stay connected to their Bluetooth-enabled devices. Smile can maintain simultaneous connections with two devices and supports pairing with up to 8 Bluetooth devices.

With increased range, seamless and instant switching between acoustic and streamed signals, hands-free calls with loved ones sound more vibrant. Clients have more flexibility, with the freedom to walk away from their phones and multi-task while staying connected thanks to up to 6x more wireless transmission power.

Easy to wear

Always ready for what each moment brings. Your clients deserve great sound and a great fit, and the new Moxi™ S-R delivers.

The sleek and stylish Moxi S-R offers exceptional comfort and reliability. Its water-resistant housing is built to keep up, whatever the day brings. And with two convenient chargers, clients can be ready for anything, at home and on the move, without missing a thing.

These IP68-rated hearing aids offer proven reliability with over 10,000 hours of rigorous testing for performance you can trust.

Easy for you

Clever solutions that help you shine

Our Experience Tech Tools, Unitron TrueFit™ fitting software, and Remote Plus app help you deliver personalised care to clients – and now, they're better than ever.

Improvements to our Experience Tech Tool: Log It All

Gain deep insights into how clients engage with the world around them, empowering you to make more personalised recommendations that enrich every moment – and amplify their daily lives. Improvements to Log It All make it even easier to support counseling conversations and technology level selection.

Faster fittings through Unitron TrueFit fitting software

Thanks to the new ERA chip, fitting adjustments, technology level changes and firmware updates are faster and more efficient when using Noahlink™ Wireless 2.

Peace of mind for clients with the Remote Plus app

Find my Devices helps locate misplaced hearing instruments, so your clients can get on with their lives.

Deliver a truly personalised hearing experience and bring joy to your clients every day.

Unitron makes life vibrant with amazing hearing solutions designed to make the experience easy. Because everyone deserves to **Love the experience.™**
