## Fitting guides

S receiver

M receiver

P receiver

UP receiver

- Open dome/cap dome
- ... Vented dome
- Power dome or sleeve mold

## Available in all technology levels

### Sound stabilization

- > AntiShock 2
- > Wind control
- > Feedback manager

### Ease and convenience

- > Remote Plus app
- > TV Connector
- > Remote Control
- > PartnerMic
- > RogerDirect
- > DuoLink
- > Binaural Phone

### Microphone options

- > Adaptive directional
- > Fixed directional
- > Fixed wide directional
- > Omni directional

### Fitting

- > First fit workflow
- > Automatic Adaptation Manager
- > Frequency compression 2
- > Tinnitus masker
- > Manual programs
- > IntelliVent

### Experience Innovations

#### Performance Tracking

- > FLEX:TRIAL
- > Log It All
- > Ratings

#### Continuous Care

- > Coach
- > Remote Adjust
- > FLEX:UPGRADE

### Personalization

- > Clarity and comfort buttons
- > Optional app programs
- > Equalizer

Moxi V-R is rated IP 68

Not all technology levels are available in all markets.

General Test Information

Lithium-Ion rechargeable battery; Source: voltage 3.8 V  
 \* Typical operating time of the rechargeable battery is based upon a combination of bluetooth streaming and regular hearing instrument usage.  
 The measurements obtained with a closed configuration using an HA-1 coupler (ANSI-3.7-1995).  
 The hearing instrument set to Unitron Truefit test settings. LLE is applied at an approximate level of 35 dB SPL.  
 Domes should never be fit on patients with perforated eardrums, exposed middle ear cavities, or surgically altered ear canals. In the case of such a condition, we recommend use of a customized earmold.  
 Monaural Latency in a fitted user mode is 6.5 mS according to ANSI 2051: 2017.  
 We reserve the right to change specification data without notice as improvements are introduced.

WARNING: Changes or modifications to the hearing aid that are not explicitly approved by the manufacturer are not permitted. Such changes may damage the ear or the hearing aid.
